Micro.

ITA **Micro.** è un progetto progetto aperto e in continuo sviluppo che ricerca l'essenza, il minimo comun denominatore. Cerchiamo l'ergonomia, la sintesi, quella piccola cosa che può cambiare davvero la nostra vita in meglio. Un materiale più leggero e resistente, un rivestimento modellabile, non mettendo mai da parte la bellezza, la comodità e l'uso che ne farai. Collaboriamo con i migliori designer per portare avanti questo progetto perché ci piace sognare un futuro prossimo dove tutto quello che abbiamo intorno sia così.

ENG **Micro.** is an open project, a work in progress. We search the essence, the lowest common denominator. We search ergonomics, synthesis, that little thing can really change our lives for a better living. A more lightweight and resistant material, a moldable coat for example. Beauty, comfort and the use you're going to make of our products is our primary target. We work with the best designers to carry out this project, because we dream a future where all you have around is better than ever.

Victorian

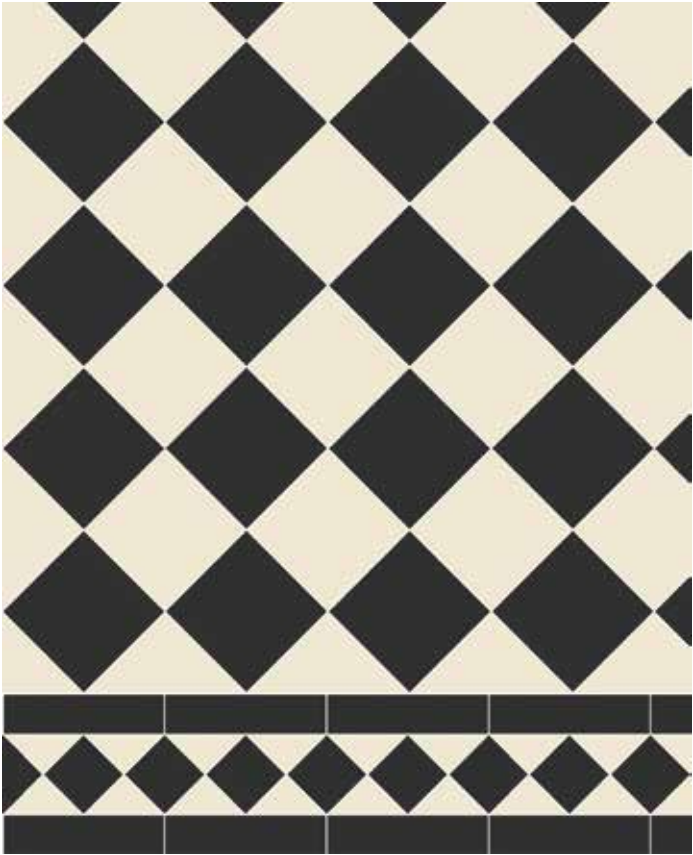

ITA Molte abitazioni britanniche costruite a partire dal 1860 potevano vantare un vialetto d'ingresso, un portico, un corridoio o una cucina rivestiti con piastrelle geometriche dai vivaci colori. Dalla seconda metà del XIX secolo, i pavimenti in piastrelle geometriche e ad encausto divennero sempre più popolari, comparando in un numero crescente di chiese, sontuose ville vittoriane ed edifici pubblici. Verso la fine del secolo, i pavimenti e i vialetti piastrellati erano diventati un elemento essenziale anche nelle case vittoriane più comuni, da Dover a Aberdeen. Queste piastrelle geometriche colorate non sono solo belle, ma anche resistenti e funzionali. Grazie alla nostra tecnologia all'avanguardia, abbiamo realizzato una gamma di piastrelle geometriche vittoriane completamente vetrificate, adatte sia per interni che per esterni, progettate per ricreare fedelmente i più pregevoli motivi e colori originali.

ENG Many British homes built from around 1860 may have had a tiled front path, porch, hallway or kitchen tiled with colourful geometric tiles. From the second half of the nineteenth century, geometric and encaustic tiled floors became increasingly popular as they appeared in an ever-growing number of churches, grand Victorian villas and public buildings. By the end of the century, tiled floors and pathways had become an essential feature in even the most common Victorian houses, from Dover to Aberdeen. These colourful geometric tiles are not only beautiful, but hard-wearing and functional too. Using our state-of-the-art cutting edge technology, we have produced a range of fully vitrified geometric Victorian tiles, suitable for both indoor and outdoor use, designed to faithfully recreate the finest original patterns and colours.
