

## GOLD COLOR PVD

Gold is a supremely distinguished finish which is a staple for decoration and tap fittings. To reduce the fragility of gold plating we have developed a gold PVD finish.

Reference: H52

## CHARACTERISTICS

Gold PVD is produced using PVD (Physical Vapor Deposit) technology, which consists of spraying an alloy of metals and gases onto faucets and accessories. The color of the PVD varies according to the composition of the gases and metals that make up this alloy. We use Titanium and Zirconium, known for their great hardness; they are the ones who improve the mechanical strength of the product. Our PVD are made on a sub-layer of nickel and chromium, the assembly ensuring excellent resistance to corrosion. The brushed appearance is performed manually on each of the parts before PVD deposit.

## ADVICE

Ease of cleaning: Very easy  
Corrosion resistance: Excellent  
Scratch resistance: Excellent  
Resistance to cleaning products: Excellent

## INSPIRATIONS

All the THG Paris coatings are created in our workshops.  
Our complete mastery of products and finishes gives you complete security and the best guarantee
