

POLISHED NICKEL

Polished Nickel, on the other hand, is a metallic finish whose glowing hues give it an overwhelmingly warm feel. Very common once upon a time, nickel is now coming back into fashion for its vintage appearance. It is appropriate to classic, luxury styles, but is equally suitable for industrial style products, where it can add a touch of elegance and whimsy.

Reference: B01

CHARACTERISTICS

The thick double layer of nickel deposit creates a waterproof barrier preventing the brass from corroding. As nickel is susceptible to tarnishing, regular care is recommended to maintain its sparkle.

ADVICE

Ease of cleaning: Easy
Corrosion resistance: Good
Scratch resistance: Good
Resistance to cleaning products: Good
